WORK EXPERIENCE

Web Developer
Zenbiller Software Solutions 06/2023 - Present

- Web Developer with 3+ years of experience in developing scalable and responsive web applications.
- Specialized in Laravel and Vue.js, with hands-on experience in developing dynamic web applications, API integration, and backend systems.
- Experienced in customizing business software solutions and maintaining multiple websites.
- Collaborating with cross-functional teams to deliver efficient and user-focused solutions.

PROJECTS

ZenBiller – Retail Billing Software

- Worked on assigned retail modules by understanding existing application flows and implementing features based on product, inventory, purchase, and sales requirements.
- Developed dynamic frontend modules using Vue.js for product management, stock handling, purchase entry, and sales-related workflows.
- Built responsive layouts and styled Vue.js components using Bootstrap, and integrated them with Laravel APIs to display and manage application data.
- Tested implemented features across related workflows to ensure accurate data handling between inventory, purchase, sales, and billing operations.

Utilized Skills: HTML, CSS, Bootstrap, JavaScript, Vue Js, Laravel, MySQL.

ZenBiller – Restaurant Billing Software

- Developed modules supporting restaurant workflows, including dine-in, takeaway orders, POS billing, kitchen operations, and ingredient-based inventory.
- Built responsive order management and POS interfaces using Vue.js and Bootstrap, based on restaurant-specific operational workflows.
- Integrated frontend modules with Laravel APIs to handle order creation, updates, billing data, and Kitchen Order Ticket (KOT) operations.
- Tested and refined application workflows to ensure smooth data flow from order placement through kitchen processing and final billing.

Utilized Skills: Html, Css, Bootstrap, Vue Js, Laravel, MySQL.

LIVF Fertility – Healthcare Website

- Developed and maintained responsive website pages for a fertility and women's healthcare platform, focusing on patient information and consultation journeys.
- Built and customized landing pages using WordPress and Elementor, supporting campaign-specific content, lead generation, and appointment enquiries.
- Integrated website forms with lead management workflows and implemented tracking using Google Tag Manager, GA4, and Meta Pixel to monitor user interactions and campaign conversions.

Utilized Skills: Wordpress.
